

WHAT WE STAND FOR

our values

POSITIVE RELATIONSHIPS

We value connection and community and support children and families through meaningful relationships built on trust and understanding. We are here to make a difference and change lives.

STRENGTHS-FOCUSED GROWTH

We celebrate your child's strengths to help them build resilience, optimism, and achievement. We thrive on seeing your child grow and learn and we celebrate every small success.

CREATIVE & INDIVIDUALISED THERAPY

We ensure all intervention is tailored to suit your child's unique developmental pathway, interests, skills, and goals. We love finding innovative ways of doing things.

LEARNING & WONDER

We employ evidence-based practice in what we do so that your child can experience positive outcomes. We are dedicated to ongoing professional and personal development to enhance our knowledge and skills. We crave growth, love learning, and seek to understand with openness and curiosity.

NEURODIVERSITY-AFFIRMING THERAPY

We change lives, not people. We celebrate and nurture people's differences and identities and listen to neurodivergent voices. We highlight strengths, promote self-advocacy, and approach our work with a trauma-informed lens.

COMPASSIONATE CARE

We are committed to helping you navigate the therapy process and feel cared for and understood along the way. We will always be honest, act with integrity, and strive to do the best by you.

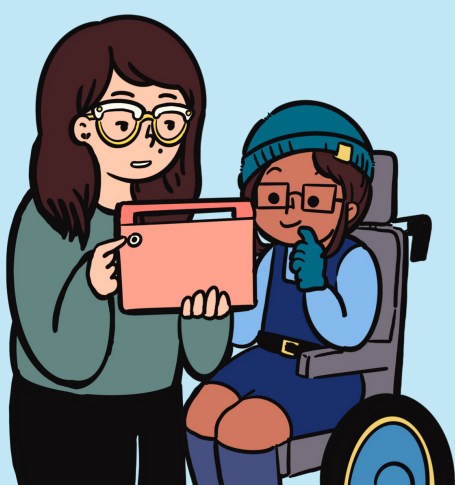

RESPECT FOR ALL

We love and celebrate all and treat others with respect, sensitivity, empathy, and kindness. We provide culturally responsive supports, have zero tolerance for discrimination, and believe in equal opportunity for all.

FUN, PLAY & LAUGHTER

We believe that children learn best through play and we endeavour to make therapy fun and enjoyable. We have enthusiasm and passion for what we do.

PERSONAL & FLEXIBLE SUPPORT

We believe supports should be accessible, flexible, and focused on your child and family. We strive for excellence in all that we do and deliver a service that is personal and sincere.
